Parents/Guardians,

This summer the district will be offering EdReady Math accounts to all students in grades 4-11. EdReady is a program that can be used to identify gaps in Math for individual students and provide them with digital learning in areas they need assistance. It can also be used for students wanting to preview and learn skills in the Math content area they will be in next school year. As an example, if your student will be taking Algebra I next school year, the district can give your child an Algebra goal on EdReady. This goal would help fill gaps or holes potentially catching your student up to their grade level if they are behind in Math.

Please call or email your child's school and request account information. Please include in your correspondence with the school which of the following options you would like for your child's account:

- Next year's Math content to introduce them to those standards.
- The previous school year Math to help fill in the gaps.
- Both, with multiple goals, so they can review the Math standards from this school year and work on the Math standards/concepts for next school year.

This is a great opportunity for your child to become more confident in Math. The residual effects resulting from the COVID pandemic indicates that this would benefit many of our students by evaluating the District's academic scores over the last three years. Please contact your child's school if you are interested in taking advantage of this opportunity.

Central-406-433-4080

Middle School-406-433-4050

High School-406-433-2330

Have a great summer and enjoy the warm weather.
